

# What does Computing look like at Higher Failsworth Primary School?

Working together with a group of other local schools and Fingertips Solutions, we have developed an engaging and exciting curriculum in line with the changes that have been made by the government. Computing plays a major part in the new curriculum and making a cross curricular and engaging scheme was at the fore front of our minds.

The computing curriculum is taught in a variety of ways using a range of hardware that we have access to in school. This can include; i-Pads, PC's, cameras, Beebots and data loggers.

Our computing curriculum is split into 5 strands; data retrieval and organisation, algorithms and programming, communication and presentation, E-Safety and using technology. These are taught throughout the course of the year in a cross curricular manner.
