

Literacy

As well as our daily Read Write Inc lessons we will be enriching our literacy skills through our History, Science and Art lessons including a range of stories with a fire theme from Sparks in the Sky, Vlad and the Great Fire of London, Lily and the Polar Bears and The Girl who went to the Arctic

We will be looking at instructions. First we will practise following them then we will make some fire themed products and recall the steps so we can write our very own instructions.

History

We will travel back along a timeline to find out more about Guy Fawkes and The Great Fire of London. We are going to use song and drama to really help bring this aspect of the curriculum to life.

Art / DT First we'll look at colours and how the primary colours can be used and mixed. Once we are confident with our colour palate we will study the artist Mondrian and discover the ways he used a limited palate.

Computing

We will be learning about E-Safety. We will be learning how to login in and out of the computer, how to search for resources and how to find familiar icons. We will also look at how to add pictures and text.

Hot and Cold

PE In our outdoor lessons the children will be practising their passing and receiving skills. Through our indoor PE the children will be creating a dance focusing on movement. The children will take inspiration from flames and fireworks! Then we will also look at seasonal change to create our own dance.

Maths

In Maths we will be taking a close look at 2D and 3D shapes, learning all about the properties and using mathematical language to describe them. We will also be spotting shapes in patterns. We will also be sorting information into given criteria to show our understanding of this new learning.

We will also recap some of our number work. We will focus on larger numbers really putting our number knowledge to the test.

As well as this we will build on our knowledge of addition and subtraction. Hopefully developing our skills so we can rapidly recall facts.

Topaz and Amber
Autumn 1.2

PSHCE
Fireman, Policeman, Ambulance service, doctors, nurses, lollipop ladies, teacher, coaches we will learn about the different people in our community would help us.

RE
Fire is in many festivals and we will be finding out how it is used and what it represents.

Science Through our super science lessons we will be taking a closer look at materials. Discovering how different materials respond to light. Looking carefully at their properties and how and why they are used in the world around us. We will then use our expertise in the properties of material to help us carry out some simple investigations
