

HIGHER FAILSWORTH PRIMARY SCHOOL

Meet the Governors – Austin Pass

I have been working as an IT Engineer since leaving University in 1997, with many of those years spent working in support of IT within schools. I created my company Fingertip Solutions in 2005 and am fortunate to have been the IT technician within Higher Failsworth Primary School since 2012. This is my first time being a governor, but I'm looking forward to the challenge. I hope that my skills within management and computing will be valuable to the school.
